

## AutoCAD 2010 Intermediate

### Description

This course is designed for the experienced AutoCAD<sup>®</sup> user who requires additional training. It incorporates the features, commands, and techniques for becoming more productive when creating, annotating, and printing drawings with AutoCAD 2010.

This intermediate-level course continues to build on the basic concepts of the *AutoCAD 2010 Essentials* course.

Hands-on exercises throughout the course explore how to create 2D production drawings. The exercises are provided in both a printed format as well as an onscreen format that can be viewed next to AutoCAD.

**Duration:** 2 days

### Objectives

The primary objectives of this course are:

- To teach students powerful tools and techniques for drawing, dimensioning, and printing 2D drawings.
- To enable students to reuse content that has been previously created, and extract information from their drawings.

With an understanding of these tools, students can begin to streamline the design process and become more productive with AutoCAD 2010.

### Who Should Attend

This course is designed for the experienced AutoCAD user who wants to learn more about AutoCAD 2010.

### Prerequisites

It is recommended that students have a working knowledge of:

- The current or a previous release of AutoCAD.
- Creating and editing basic AutoCAD objects.
- Microsoft<sup>®</sup> Windows<sup>®</sup> 2000, Microsoft<sup>®</sup> Windows<sup>®</sup> XP, or Microsoft<sup>®</sup> Windows<sup>®</sup> Vista.
